

Module 2: Assumptions and Worldview

Video 2-1 Review/Preview

During the past week you have explored and reflected on your “story” and perhaps touched base with what might be called “core issues” that are hidden in your subconscious. Issues that have been waiting to be brought into the light and let go.

I shared my story and how I came to see what I see, know what I know through my life experiences.

In this module we will look into your worldview, your fundamental assumptions about the nature of the Universe, your place in it and how it applies to your personal journey through life.
